

project services for british aerospace

acknowledged as one of the largest independent companies of our kind in the north west and based upon a foundation of technical expertise and a wealth of experience, the rosebery group has been developed over the years to provide a total service across a broad range of electrical and instrumentation design, installation and manufacturing.

our relationship with british aerospace and airbus ltd. has existed since 1987, the year of the rosebery group's inception . we have been involved with many projects at the broughton site and have developed a good, safe working knowledge of the plant.

projects that we have been involved with include:-

aircraft hangar electrical services

aircraft service centre refurbishment

external floodlighting

A300, A320, A340 wing assembly rig electrical services

radar room electrical services

router workshop power and lighting

installation of overhead crane supplies and infra-red control

damping stations

office refurbishments

site 2 ESA workshop

skin mill electrical services

A300, A320, A340 manufacturing platform power and lighting
