project
plant refurbishment

value
£ 670 000 electrical & instrument project

In July 2000 The Rosebery Group tendered for and won the E&I contract for Project Phoenix. The E&I contract was part of a multi-discipline upgrade and refurbishment at the Corning No.1 Fibre Cable Plant. Rosebery did exceptionally well to meet the entire strict program deadlines imposed upon them in both design and installation.

Their overall performance throughout the project was excellent, with supervisors and operatives a pleasure to work with. They were particularly good with Health & Safety issues abiding by Corning's demanding site hygiene rules and regulations. I would recommend The Rosebery Group to anybody looking for a highly motivated, competent Electrical Contracting Company.

Phil Hough - Project Phoenix Co-ordinator.

project details

LV electrical power system

sub mains cabling to power distribution boards and MCC's

BMS system and field wiring to all plant pilot control device

all plant lighting and emergency lighting

electrical and mechanical plant services to gown up rooms, humidity rooms and temperature controlled environments

22,000 hours worked - no lost time accidents

60 week project completed on time and within budget
