project
refurbishment of lever house – east, west & south wings

value
£ 1.25m electrical contract

“The completed results have exceeded all expectations and the three wings are now permanently occupied.”

office area with new lighting system (right),
and fully refurbished office (above)

design and installation of bespoke lighting system
no lost time accidents

project completed on time and within budget

refurbish office space to integrate a modern, workable solution into a grade 2 listed, twentieth century building. several solutions had been considered in recent years to incorporate lighting, power, data and building services, but all proved unsuitable as they involved major changes to the building structure.

also included in the project was the refurbishment of 1500sqm to provide a new office environment to include meeting rooms, break out / piazza areas, IT suites and video conferencing facilities

project details

design and build of electrical services to provide new power supplies and lighting

integrated raised computer flooring systems

installation of structured cabling system

provision of fire alarm and security detection systems

underfloor power systems
