contract
design and manufacture of bespoke test rigs

details

included within the portfolio of services provided by the rosebery group is the design and development of bespoke laboratory prototype and specialist test rigs, manufactured in accordance with detailed requirements.

the rosebery group offer design, manufacture and assembly of the structure, components, instrumentation and control systems required in the manufacture of pilot and prototype rigs.

such undertakings include the development of functional specifications, design, manufacture of hygienic pipe work, vessels, pumps, valves and mixing equipment to meet client specifications and industry standards.

software, control and instrumentation systems are designed, tested and commissioned by our own engineers. bespoke control panels, stations and equipment are manufactured to suit in our purpose built facilities.

in addition to the UK, rigs have been dispatched to europe, japan and USA .
